ISTQB-certified teams of
software engineers and testers

OBJECTIVES

To create strategic partnerships
with entrepreneurs, small
companies, and the
incubator/accelerator community
in Canada, to provide high-
quality and cost effective
software development and
prototyping services.

ABOUT US

Pernix Solutions delivers software development and evolutionary prototyping for web and mobile application creation, UI and UX design and product development consulting.

Pernix also offers expert team augmentation for software development and ISTQB-certified QA and testing at an accessible cost for business incubators and those needing to strengthen their IT capacity

OUR OFFER

Talented, experienced interdisciplinary teams provide incubators/accelerators, start-ups and small companies info-tech consulting and prototyping to bring ideas into reality.

Pernix provides dedicated engineering services on a fixed-fee monthly retainer basis with no minimum requirement, creating the right mix of cost, proficiency and execution to help entrepreneurs and small companies toward their initial product launch.

CLIENTS

Clients receive efficient info-tech consulting and prototyping that allows for fast validation of disruptive ideas and creation of proof-of-concept models. Pernix has worked with Labin in Costa Rica, Intel, Table XI, LiveWatch and Flatirons in the US, and with Abakis in Canada."
