PHP, Java, JavaScript, NodeJS, Backbone, AngularJS, iOS, and Android

### E-COMMERCE

Website design and development, ecommerce platform installation, Magento, Drupal, WordPress

### MOBILE APP DEVELOPMENT

iOS, Android, HTML 5, SASS CSS

## OBJECTIVES

To develop strategic alliances with Canadian manufacturers who need design, architecture and integration of Internet-of-Things technology for home automation, controls, embedded systems and cognitive intelligence platforms. R&D partnerships in the area of embedded systems for health technology engineering are also being sought.

## ABOUT US

Quality XP Development (QXD) specializes in working with start-ups and major international brands, such as Linksys and Cisco, in joint IP development, prototyping, new product introduction, concept development, product re-engineering, and emerging market-focused IoT solutions.

QXD also provides expert e-commerce software solutions, mobile application development, and custom software development services.

## OUR OFFER

Whether it's manufacturers of home appliances or companies needing specialization in embedded systems, all clients benefit from QXD's development services over the extended lifecycle of the project, managing everything from business analysis and project management, to architectural and modular design, to final delivery at an accessible cost.

## CLIENTS

Recent work includes working as part of the team that developed Linksys Velop™ consumer mesh Wi-Fi routers, that won first place at CES 2017 in the networking category overall. QXD's IoT solutions are ideal for clients in: automotive, transportation and logistics; smart energy and security; industrial automation and enterprise; consumer and other M2M; and digital home automation.
