ABOUT US

10Guards helps companies become cyber resilient by providing business solutions that protect vital assets before, during and after cyber attacks. We provide business continuity through services that detect, analyze and eliminate cyber vulnerabilities, help define internal business processes to reduce vulnerability and help businesses recover from cyber attacks and other malicious events.

OUR OFFER

With decades of personal experience gained from working within some of the toughest cyber environments, 10Guards can offer the knowledge and detailed services that provide a solid set of protections against threats.

OUR CLIENTS

10Guards has worked with large technology developers in the US, as well as global corporations in the retail, e-commerce, mining, entertainment and software development sectors.

OUR OBJECTIVES

To partner with local Canadian service providers to augment their cybersecurity offerings, with a goal of entering the market and building out a Canadian service delivery capability.
