ABOUT US

SoftElegance is a global software development company with over 25 years of experience building a hosted framework for the management and optimization of big data and related applications for use by enterprises in the oil and gas, manufacturing and retail sectors. The framework allows for fast and efficient implementation of automated processes using predictive analytics, without complete custom development from the ground up.

OUR OFFER

Having sold the framework to some of the world's largest petroleum companies, SoftElegance understands the needs of large data driven operations and can help reduce costs and speed up service delivery.

OUR OBJECTIVES

To work with oil and gas, retail and manufacturing sector companies in order to provide software development services built around the framework.

To partner with local sales representative in Alberta for further work with oil and gas industry.

OUR CLIENTS

SoftElegance has worked with variety of companies, ranging from dynamic small and medium businesses to Fortune 500 companies across multiple sectors, including NOV, DMS, Waste Management, RTI and OnProcess
