## ABOUT US

Perfectial is a seasoned custom software development company that provides product design, architecture, development and testing services to help quickly prototype and build sophisticated software products. Perfectial, with over 200+ programmers and deep expertise in dozens of technologies, has worked with software companies in Silicon Valley and Europe to help increase the speed of project completion, lower their cost of development and augment their talent.

## OUR OFFER

Perfectial helps software companies increase their capabilities and product development speed by offering software design, prototyping, development and testing services.

## OUR CLIENTS

Perfectial has worked with software & technology companies around the world including DataXu, Ayasdi, Clickatell, Arthur D. Little and Prosper.

## OUR OBJECTIVES

To partner with Canadian software development and consulting agencies to provide software development outsourcing services.
