## ABOUT US

MD Cloud practice solutions™ is a collaboration between a knowledgeable and experienced group of healthcare executives and a talented group of software engineers. We specialize in the design and development of mobile and web applications for secure and efficient operation of modern medical and dental practices, including enhanced data management, encrypted record keeping and communications, billing, claims submission, and more.

## OUR OFFER

Our digital services are designed to be modular, allowing administrators to create a customized solution that is specific to the needs of their practice, from a single process to a comprehensive suite of tools for running a secure, productive, and efficient business.

## OUR CLIENTS

We currently work with over 60 anesthesiology practices, and the products are being used by over 3,000 users and 500 healthcare facilities in the United States.

## OUR OBJECTIVES

To develop relationships with medical and dental organizations and stakeholders in Canada, with the goal of working with Canadian industry service providers to offer cost-effective and compliant solutions to practitioners.
